Movianto in Germany and Austria

Movianto is a logistics and distribution service provider specialised in the pharmaceutical, biotechnology and healthcare industry. Movianto's broad portfolio offers manufacturers warehousing and transport solutions as well as repackaging and relabelling services, controlled drugs, clinical trials and samples management. At Movianto, we have the expertise to act as a reliable outsourcing partner across the entire supply chain.

The consistency and transparency of validated processes is one of our top priorities, always driven by the highest quality standards in all areas of our business. You can confidently hand over responsibility for the logistics of your products and retain control of the supply chain with various monitoring and reporting tools at the same time. Your flexibility and efficiency is what we work for at Movianto.

With Movianto as your preferred partner you benefit from individual business solutions, bundled by an extensive pool of local knowledge throughout Europe. Due to an ever-increasing demand for a European distribution centre (EDC), Movianto Germany has doubled its storage capacity over the past few years, showing a clear willingness to invest in your needs.

Using existing synergies within geographical areas, Movianto Germany and Austria are managed as one region within the Movianto Group.

Warehouse

Movianto Germany operates two warehouses. One facility is located in Kist, near Würzburg, one in Neunkirchen, in the Saarland region:

- Ambient storage space for over 32,000 pallets
- Cold chain storage space for 2,700 pallets
- 500 pallet spaces for controlled drugs

Movianto Austria is located in Vienna and offers:

- Ambient storage space for over 6,800 pallets
- Cold chain storage space for 200 pallets
- More than 200 pallet spaces for controlled drugs

The warehouses have specialised and separated areas to store clinical trials, samples and promotional material. They provide an excellent platform for a European distribution centre.

Warehousing services

At Movianto we have the expertise to manage the whole order-to-cash cycle.

We monitor your products along the whole supply chain with our warehouse management system, offering you direct access to your stock movements.

Warehousing services include:

- High-performance sorting and dispatch technology
- Bar code picking
- Batch tracking
- Returns management
- Dedicated customer service

Our wholly owned, state-of-the-art facilities fulfil even the most exacting requirements in terms of temperature and safety restrictions.

Dedicated to healthcare logistics

Manufacturing services

We can customise products in a number of ways to meet the requirements of specific markets. Movianto's manufacturing services bring several benefits to clients, offering them the best individual solutions for their products.

Manufacturing services include:

- (Re-)packaging
- (Re-)labelling
- Kitting of Displays
- Rework

Movianto also covers all areas of samples and clinical trials management.

With a higher flexibility within the supply chain and the avoidance of out-of-stock situations, Movianto has proven that these in-house services contribute to a smooth running of business.

Distribution

Movianto assures ideal distribution solutions for your products and markets within a regional or European scope. Our services are customised to deal with large volumes or small amounts of specialised pharmaceuticals.

During the entire transport of your items, including temperature-sensitive or cold chain products, the temperature is monitored without any interruptions.

Distribution features:

- 24-hour delivery
- Same day or express delivery
- Continuous temperature monitoring
- Data recording and satellite tracking tools

We see ourselves as your reliable partner with the expertise to develop your ideal distribution solution. Movianto delivers to all your customers, including pharmacies, hospitals, wholesalers, dentists and doctors.

Quality

At Movianto we constantly provide high-quality standards, based on the consistency and transparency of validated processes. These standards can be customised to ensure that your individual business objectives are met at any time.

Our standards include:

- Certified in accordance to DIN ISO 9001:2008
- GMP/GDP/GSP guidelines
- Continual staff training
- Regular internal and external audits

As a commitment to our clients, Movianto has published and internalised a quality charter. This ensures that existing high standards are met and ongoing improvements will be documented and put into practice. Product and patient safety is the core of our daily business.

IT system

Movianto's central IT platform, Movianto Prince, ensures full transparency along the whole supply chain, taking into account distinctive business needs.

Once a client is connected to the platform, Movianto Prince provides different service tools, for example to check and monitor the stock and sales online via dynamic reporting.

IT services include:

- Central IT platform Movianto Prince
- Real-time information
- Online consignment tracking
- Individual reporting

The user-friendly platform is based on the principle that only one single connection between the client's IT system and Movianto Prince is needed – to exchange data with all Movianto subsidiaries.
