

## Direct delivery on the same day

Movianto Deutschland is aware that optimising the supply chain and increasing its efficiency is an important issue for the pharmaceutical, biotechnology and healthcare industry. Dynamic market changes have led companies to rethink and strategically reconsider the storage and distribution of their products.

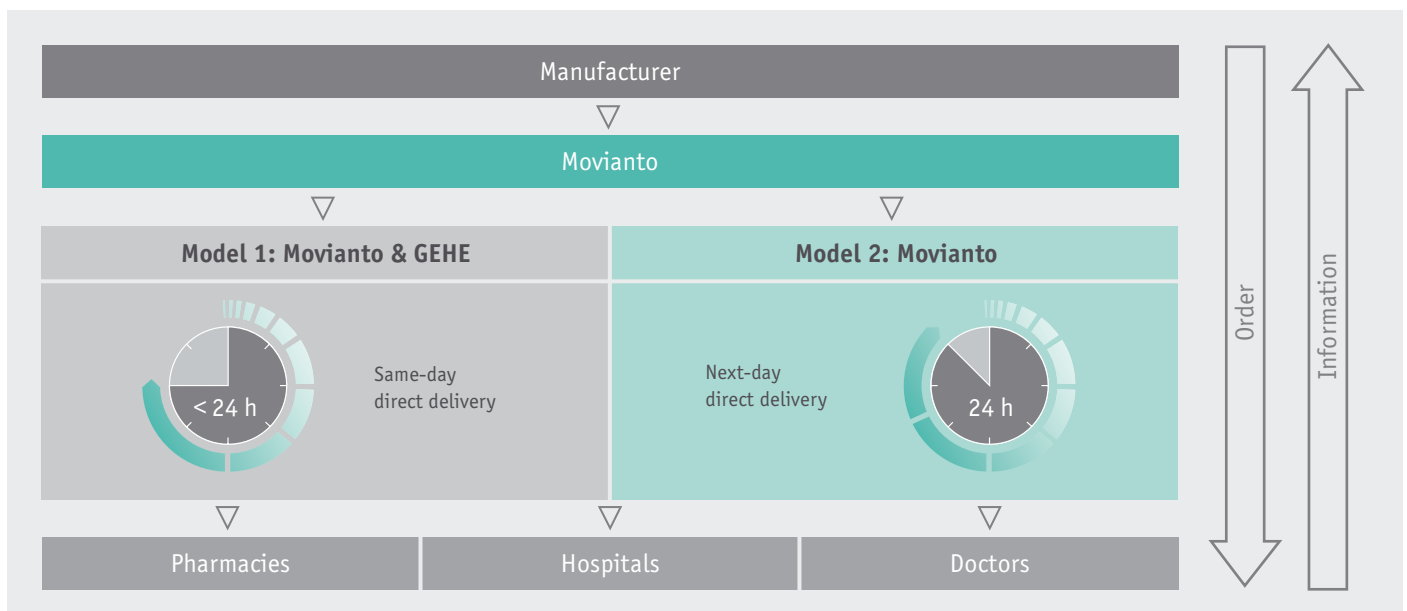

Movianto has foreseen this development and has prepared new solutions for the logistics and distribution of sensitive products. We provide manufacturers with new solutions to optimise the supply chain in an increasingly complex market environment.

Together with GEHE Pharma Handel GmbH, which also belongs to the Celesio group, Movianto will pass on the advantages of this strong association to you. The two central Movianto warehouses, together with the 20 GEHE regional distribution centres, make it possible for us to deliver your products directly to your customers on the same or next business day.

Take this opportunity to rethink your logistics management and distribution structures in a totally new way; with a partner who is as dedicated to meeting your requests as you are.

- Products remain the property of the manufacturer
- Control of the supply chain
- Transparency of data
- Call centre support
- Two central warehouses
- 20 regional distribution centres
- Coverage throughout Germany
- High level of customer satisfaction
- Batch tracking
- End-to-end temperature control
- RFID-supported transport

### Direct delivery models

## Cold chain & RFID transport monitoring

Sensitive products require individual solutions. Our strength with regard to innovations and our expertise in providing solutions ensure that Movianto sets the standards in pharmaceutical logistics. One example of this is our new, state-of-the-art cold storage facility which contains 2,000 pallet spaces. From the time products arrive throughout the storage, from picking to transportation, the cold chain is never interrupted. In the warehouse itself, a permanent temperature control guarantees constant cooling between 2 and 8°C.

We take the utmost care when storing your temperature-sensitive products. Depending on the type of product and the selected distribution model, we recommend either active or passive cooling.

Together with our partners, we have access to refrigerated vehicles and cooling boxes. The latest RFID- and GSM-supported technology guarantee continuous tracking and documentation of your products.
