Dedicated to
healthcare logistics

Movianto in Belgium

Starting as a company transporting conditioned goods in 1978, Movianto Belgium Dirk Raes has developed into one of the leading temperature controlled logistics provider. With a storage capacity of 7,000 pallets, including 3,000 cold chain storage spaces, we are perfectly suited to act as a European Distribution Centre.

The portfolio contains best services in cold chain distribution, pharmaceutical storage including narcotic products, pick & pack and dedicated express transport throughout Europe. The strategically located warehouses in Gent and Aalst comprise 10,000 m² of warehouse storage capacity, as well as fully validated temperature-control and information systems.

Our expertise guarantees our clients from the pharmaceutical and healthcare industry innovative and efficient logistics solutions, with patient safety being one of the main priorities when serving pharmacies, doctors, wholesalers, laboratories and hospitals.

Movianto Belgium Dirk Raes' efforts in safeguarding the environment resulted in the ISO 14001 certification. Due to a strong sense of social responsibility, the company was also awarded the Environmental Charter from their chamber of commerce.

Movianto can serve as your single partner for storage, warehousing and distribution of your pharmaceutical products. Benefit from our experience and take advantage of our warehousing and distribution network – now and in the future.

Warehouse

Movianto operates two warehouses in Aalst and Gent, from where all national areas and the Benelux region are covered.

The facilities provide:

- Ambient storage (15–25°C)
- Cold chain facilities for up to 3,000 pallets (2–8°C)
- Frozen storage area (-20°C)
- Controlled drug storage
- Continuous temperature control and recording
- Storage and handling of clinical trials and samples

Strict storage and handling requirements presuppose existing, transparent procedures and high security standards on Movianto's side – flexible enough to adapt to clients' individual business needs from long-term pallet storage to 24-hours emergency stock service.

Warehousing services

The two conditioned and validated warehouses are the centres of our storage activities. Products are continually monitored from the time they enter the warehouse up to their final destination. We offer complete, customised pharmaceutical solutions to deliver products to the customers safely and on time.

Warehousing services include:

- Sequential bar code labelling
- 'Virtual' warehouse with the highest traceability
- Order to cash
- Clinical supplies
- 24/7 emergency stock service

We can customise your products in a number of ways, for instance re-packing and re-labelling or assembling of product kits, as well as promotional material handling.

Dedicated to healthcare logistics

Transportation

Movianto Belgium Dirk Raes' expertise as one of the leading specialist temperature controlled logistics provider in Europe, guarantees minimum risk and the highest safety to deliver the products under the right conditions, at the right time, to the right place.

Our services include:

- Own fleet
- Multi-temperature vehicles
- Dedicated Express transport throughout Europe
- Emergency delivery service
- GPRS tracking technology

Our own fleet of multi-temperature vehicles also covers backup temperature systems for the highest product safety. The special vehicles are able to transport products that require different temperatures in one journey – guaranteeing full temperature control along the whole supply chain.

Cold chain

The temperature of cold chain products is under constant supervision and fully traceable on its way from the manufacturer to customers. Clients can be assured that their orders will be carried out in line with the highest safety requirements.

Cold chain distribution includes:

- Cold chain storage capacity for 3,000 pallets
- Fully audited and traced 2–8°C cold chain delivery services
- Real-time status of products
- Full-day reports, detailing temperature conditions

We stand for high quality in temperature control and assure our clients an uninterrupted cold chain management of their products, which can be verified with our flexible tracking and reporting tools. In addition, a personal contact person can give daily feedback during every stage of the distribution flow.

Quality

Product and patient safety are our highest priorities and the core of our daily business. We operate with consistent and transparent, validated processes.

Our standards include:

- Certification in line with ISO 9001:2008
- Good Distribution Practice (GDP)
- Validation Master Plan (VMP)
- Registration and in-house calibration
- Customer service

As a dedication to our clients, Movianto has made quality its trademark. The publication and internalisation of a quality charter ensures clients that high standards are met and ongoing improvements will be promoted and continuously established.

IT system

Movianto's IT system ensures full transparency along the supply chain and brings individual data access in line with distinctive business needs. We provide you with an IT solution that best meets your business objectives.

IT services include:

- Central IT platform Movianto Prince
- Centralised vehicle scheduling
- Online consignment tracking (ePOD)

Once a client is connected to the platform, Movianto Prince provides different tools, for example to check and monitor the stock, products and sales online via dynamic reporting.
