Movianto in Spain

As a reliable and competent partner Movianto España enjoys the trust of international manufacturers from the pharmaceutical, biotechnology and healthcare industry, offering innovative logistics and distribution solutions.

Providing services across the entire supply chain from warehousing to transportation, cold chain logistics and specialist services such as repackaging and relabelling, customers confidently hand over responsibility for the logistics of their products to Movianto.

We handle your products as if they were our own, and therefore our services are carried out with the greatest possible level of expertise and knowledge, guaranteeing the highest standards of quality. This applies to all steps of our business processes, from order taking to delivery to your customers, as well as invoicing and cash collection.

The infrastructure of our distribution network allows 24-hour delivery services to customer groups such as wholesale, hospital and retail pharmacy throughout the whole of Spain and Portugal.

Whichever solution you choose, we will carry out your logistics processes with the highest degree of flexibility and efficiency.

Warehouse

Movianto's four facilities are ideally located and cover the whole Iberian region. Two warehouses are located near Madrid (Valdemoro and Getafe), one in Barcelona and one in the Canary Islands (Las Palmas de Gran Canaria).

The facility provides:

- Temperature-controlled warehouses (15-25°C)
- Temperature-controlled cold storage (2-8°C)
- Temperature-controlled area
- Storage for narcotic products (controlled drugs)
- Special storage for promotional material
- Validated by the Spanish Medical Agency

Movianto offers a total storage capacity of more than 25,000 pallet spaces enabling us to meet our clients' requirement for an Iberian central distribution solution.

Services

As a healthcare logistics specialist, Movianto offers the best and most flexible solutions for your pharmaceutical and healthcare products as well as medical devices. Our strength is that we can create services to meet any product requirements.

These services include:

- Full range of logistics services: reception, storage, pick & pack
- Order-to-cash
- Repackaging and relabelling
- Kitting service
- Clinical trials
- Management of promotional material

Clients further appreciate our service of customising products by adapting your products to the specific requirements of your market.

Dedicated to healthcare logistics

Distribution

Movianto will work with you to develop the ideal distribution solution for your products and markets.

We will deliver your products to your customers such as: pharmacies, hospitals, wholesalers, clinics or general practitioners.

Distribution features include:

- Full batch traceability through bar code labels
- Transport services for Spain and Portugal within 24 hours
- For the entire Iberian region, special delivery services at set times: 8.30 a.m., 10 a.m. or 1.30 p.m.
- 24-hours service for the Canary Islands, Ceuta and Melilla
- Active cool transportation services including online temperature monitoring
- Online shipments tracking

If you require a faster service we can offer express delivery of your product, depending completely on your requirements.

Reporting and IT

Our customers enjoy full transparency on stock movements at batch level, thanks to Movianto's customised interfaces.

We offer:

- Validated warehouse management system
- Electronic file communications
- FEFO management
- Batch number traceability right up to delivery to the customer
- Tracking & tracing system
- ePromotion tool
- Proof of delivery

Once implemented, our central European IT platform, Movianto Prince, ensures that you can call up any data, online, at any time, via standard interfaces and real-time reports. This includes, for example, receipts of good documents, orders or inventories.

Quality standards

As a highly experienced specialist with a clear focus on pharmaceutical and healthcare products we know the optimum conditions and processes required for your valuable products and guarantee the implementation of these at all times.

Our standards include:

- EN ISO 9001:2008 certification
- GMP/GDP guidelines
- Validated temperature and humidity control system

Regular audits conducted by our clients, as well as continuous training of our healthcare professionals, illustrate our commitment to the highest standards and performance level.

Iberian region

The business of global distribution is becoming increasingly complex. Our international clients from the pharmaceutical, biotechnology and healthcare industry choose us because we manage the complexity required in storing and distributing their products in Spain and the Iberian region.

- Same-day delivery for all of Spain and Portugal
- Availability of an authorised Portuguese pharmaceutical warehouse in Lisbon

Our location acts as a central Iberian hub for our clients delivering products to Portugal. To increase flexibility we also offer additional storage capacity in Lisbon, Portugal.
