

Movianto UK

Dedicated to
healthcare logistics

movianto 

Movianto in the UK

From its early beginnings in 1976 as a pioneering pharmaceutical delivery service, Movianto has grown rapidly to become the UK's leading healthcare logistics provider.

Expertise in warehousing, transportation, cold-chain distribution, home care as well as client-specific services enables us to constantly move forward and develop innovative logistics solutions for the pharmaceutical and healthcare industry.

Our strategically located and wholly owned business operations comprise 30,000 m² of warehouse storage capacity with fully validated temperature control and information systems.

With over 150 clients in the UK, seven strategically located regional depots and a fleet of over 200 vehicles, Movianto has the network to deliver to every hospital, pharmaceutical wholesaler, pharmacy and GP surgery across mainland UK on a daily basis.

Sophisticated logistic packages include Manhattan WMI warehouse management, SAP sales and processing, centralised vehicle scheduling and satellite vehicle tracking. Movianto offers clients accurate and real-time information on their orders and inventory at all times.

As part of Celesio AG and its group companies AAH, Lloydspharmacy, Pharmexx and Evolution Homecare; Movianto offers an unparalleled platform to design innovative supply chain solutions.

Warehouse

Our main warehouse is situated in Bedford and we have additional warehousing capacities at our regional depots to provide full coverage across mainland UK.

The facilities provide:

- 30,000 m² of warehouse storage capacity
- Air-conditioned ambient storage for 55,000 pallets (15–25°C)
- 4,500 pallets for cold storage (2–8°C)
- Two high-security storage facilities with 1,400 pallets for controlled drugs

We ensure product security throughout the whole supply chain. Movianto's expertise helps to evolve solutions as your business develops.

Transportation

With seven depots, Movianto manages 6,000 consignments every day. We are the only provider with next day delivery of both ambient and cold chain consignments throughout mainland UK.

Our services include:

- Own fleet
- Cold chain transportation
- Satellite tracking technology
- Daily reports, detailing temperature requirements
- 24-hour delivery
- Emergency delivery service

Our own experienced drivers take great care to ensure safe delivery of your products. Movianto delivers not only to wholesalers, but also to individual hospital departments, retail pharmacies, GP surgeries, nursing homes and home patients.

Dedicated to healthcare logistics

Cold chain

Our cold chain handling capabilities distinguish us from other providers in the sector. Movianto's warehouses were the first to be approved by the MHRA (Medicines and Healthcare products Regulatory Agency) for the storage and distribution of cold chain pharmaceuticals.

Our fleet features unique dual-temperature monitoring systems to check the temperature of cold chain consignments every three minutes.

Cold chain distribution includes:

- Dual-temperature vehicle fleet
- Fully audited and tracked 2–8°C cold chain delivery services
- Real-time status of products

Movianto's temperature alert system can pre-empt any damaging temperature fluctuations, ensuring product integrity is maintained.

Specialist services

Over and above our core warehousing and distribution capabilities, Movianto has developed a wide range of services that can be tailored to deliver your business goals.

Our services include:

- Full order-to-cash management
- Centralised clinical trials management
- Home delivery
- Selective DTP
- (Re-)labelling and (re-)packaging
- Site of import license

Movianto also covers all areas of samples and promotional material management.

Our services are supported by a full Business Continuity Plan with defined processes to ensure the reliability of your supply chain.

Quality

Quality is the core of our daily business, thus we assure ongoing high quality standards and the consistency and transparency of validated processes.

Our standards include:

- Certification in accordance with DIN EN ISO 9001:2008
- GMP/GDP guidelines
- Continuous temperature recording
- Continual training of our healthcare professionals
- Customer service

As part of our commitment to our clients, Movianto has published a pan-European quality charter to make sure that existing high standards are met and that ongoing improvements are documented and implemented.

IT system

Movianto's IT system ensures full transparency along the supply chain with individual data access.

Our core systems include:

- Central IT platform (Movianto Prince)
- Batch tracking with RF (radio frequency) technology
- Online consignment tracking (ePOD)
- Web access to real-time stock and order status
- Sales order processing and cash collection options using SAP

Once you are connected to the platform, Movianto Prince enables you to check and monitor your products and sales online using our dynamic reporting tools.
