Movianto Ireland

Movianto is a logistics and distribution service provider specialised in the pharmaceutical, biotechnology and healthcare industries. Movianto's broad service portfolio offers its clients warehousing and transport solutions as well as repackaging and re-labelling services, controlled drugs, clinical trials and samples management.

At Movianto, we have the expertise to act as a reliable outsourcing partner across the entire supply chain. We are continually developing individual logistics solutions, thus allowing clients to benefit from the greatest possible level of expert knowledge along with the highest service standards.

The consistency and transparency of validated processes is one of our top priorities, always driven by the highest quality standards in all areas of our business. You can confidently hand over responsibility for the logistics of your products and retain control of the supply chain at the same time. Your flexibility and efficiency is what we work for at Movianto.

As part of Celesio AG, a leading international service provider within the pharmaceutical and healthcare markets, Movianto offers an unparalleled platform for designing supply chain solutions such as direct-to-pharmacy (DTP) – to meet the needs of the industry today and in the future.

Warehousing

Movianto meets strict storage and handling requirements and has the expertise to adapt to changing business needs.

We have two dedicated warehouses located in Dublin, one in Chapelizod and one in Greenogue, with the following storage capacities:

- Ambient storage space for over 12,000 pallets
- Cold chain storage for 250 pallets
- Over 100 spaces for controlled drugs
- Continuous temperature control and recording
- Storage and handling of clinical trials and samples management

Both warehouses use voice recognition warehouse management systems with 'hands-free' capabilities and batch tracking technology – for utmost accuracy and productivity within the complex environment of warehousing and distribution.

Warehousing Services

At Movianto we have the expertise to manage the whole order-to-cash cycle.

We are in an ideal position to deliver specialised solutions with a clear focus on client requirements and product groups, offering you direct access to your stock movements.

Warehousing Services include:

- High-performance sorting and dispatch technology
- Batch tracking
- Returns management
- Dedicated Client Services team and Key Account Managers

Our wholly owned, state-of-the-art facilities fulfill even the most exacting requirements in terms of temperature and safety restrictions.

Dedicated to healthcare logistics

Manufacturing Services

We can customise products in a number of ways to meet the requirements of specific markets. Movianto's manufacturing services bring several benefits to clients, offering them the best individual solutions for their products.

Manufacturing services include:

- (Re-)packaging
- (Re-)labelling
- Kitting of displays
- Rework

With a higher flexibility within the supply chain and the avoidance of out-of-stock situations, Movianto has proven these in-house services contribute to a smooth running of business.

At Movianto we keep pace with our clients and are willing to constantly improve and grow our services, as well as to develop new solutions; acting as a true long-term strategic partner.

Transportation

During the entire transportation of your items, including temperature-sensitive or cold chain products, the temperature is monitored without any interruptions. With our dual-temperature vehicle fleet, we can deliver both ambient and cold-chain products at the same time.

Our transport services include:

- Wholly owned fleet for regional solutions
- Multi-temperature vehicles with continuous temperature monitoring
- GPRS tracking and data recording – 'Seven Eye' and 'ePOD' technology
- 24-hour delivery
- Direct-to-pharmacy (DTP)

Movianto operates a daily delivery service to all customers, including hospitals, pharmacies, wholesalers, doctors, dentists and home patients. Your product will be delivered under the right conditions, at the right time, to the right place.

Quality

At Movianto we constantly provide high quality standards, based on the consistency and transparency of validated processes.

Our standards include:

- Certified in accordance with DIN ISO 9001:2008
- IMB (Irish Medicines Board) Licensed Wholesaler & Manufacturer
- Standardised Quality Management System (QMS)
- GxP compliance

Movianto's commitment to continual improvement is an ongoing objective. Processes in all areas of our business are subject to regular scrutiny as part of our internal Quality Management System.

In addition, our clients conduct routine audits annually. Product and patient safety is the core of our daily business.

IT system

Movianto's IT system stands for full transparency along the entire supply chain, taking into account distinctive business needs.

We offer:

- Central European IT platform Movianto Prince
- Batch number traceability
- Track & trace
- Online proof of delivery (within 15 minutes of delivery being made)

Individual data access to all connected Movianto subsidiaries is managed with only one IT interface, Movianto Prince. Our information systems keep us at the forefront of innovation – in the warehouse, on the road and at our customer service.

Our sophisticated IT packages ensure that the accurate status of your stored goods or travelling consignments is only a phone call, email or interface away.
