Movianto Transport Solutions

Going that extra mile

Movianto Transport Solutions consolidates and manages worldwide freight and offers transportation solutions for pharmaceutical and healthcare products whether by air, sea or land. Manufacturers benefit from an optimised transportation model, reducing overall freight costs whilst increasing operational efficiency. A control tower oversees all movements and suppliers and guarantees one point of contact for the manufacturer.

We have selected a panel of suppliers who show a commitment to the pharmaceutical industry in terms of their management systems and fleet specifications. Combined with our own locally managed distribution capabilities in key markets we provide GDP compliant transport which is unique in terms of quality and geographic coverage.

Movianto Transport Solutions is a business unit of the Movianto Group, a logistics and distribution service provider specialised in the pharmaceutical and healthcare industries. From warehousing, transportation and cold chain logistics to specialist services such as order-to-cash, individual repackaging and relabelling, as well as the management of clinical trials, samples and promotional material, Movianto has proved itself to be a thoroughly reliable partner throughout the entire supply chain.

Benefit from our experience in the pharmaceutical and healthcare sectors and take advantage of our services and solutions to increase the flexibility and transparency of your supply chain.

Freight Management

Movianto manages the worldwide movement of pharmaceutical products. We individualise the transport strategy for every client according to their needs and continually monitor all shipments to guarantee product integrity and deliver economies of scale.

The service ensures:

- International carrier management
- Control tower as single point of contact
- Combined multi-modal solutions for road, air and sea freight
- Online track and trace

Well-thought-out IT solutions support our operations in the form of an Enterprise Supply Chain Manager software combined with client and supplier integration through Movianto's central IT platform.

Air and Sea Transport

As many of Movianto's clients are global enterprises manufacturing products on other continents, Movianto facilitates the flow of goods into our Europe-wide network by both air and sea freight. By partnering with select shipping lines, airlines, cargo agents and customs brokers we are able to source competitive international freight solutions that are tailored to our clients' needs.

Services include:

- Full range of import/export services
- Door-to-door air freight
- FCL and LCL sea freight
- Consolidation and customs clearance services
- Documentation management
- Cargo insurance

Movianto Transport Solutions is a registered member of the British International Freight Association (BIFA) and operates according to BIFA standard terms and conditions.

Dedicated to healthcare logistics

Road Transport

Movianto's road transport services in Europe consist of a blend of in-house and outsourced fleets ensuring that the highest standards of equipment and latest technologies are always provided.

Key features:

- Pan-European road freight solutions
- Ambient, temperature control and cold chain
- FTL, LTL and consolidation services
- Status tracking and remote temperature monitoring through GPS
- Enhanced levels of security for high-value and sensitive products

From small consignments to full trucks, we deliver your products on time, every time.

Specialised Product Transport

In the pharmaceutical and healthcare industries, the transport of sensitive and specialised products has to be error-free. As experienced providers dedicated to this sector, Movianto's expert team will provide for all aspects of your door-to-door transport requirements.

Specialised transport in the areas of:

- Active and passive cooling
- Temperature control
- Handling of controlled drugs
- Standard and express lead times
- Dedicated transport

Together with our partners, we have access to temperature controlled vehicles and cooling boxes. Innovative reporting systems guarantee continuous temperature monitoring, tracking and documentation of your shipments.

Our team will work with you to identify the most effective solution meeting the needs of your products.

Transport Network Design

Movianto's team strategically plans and overviews the flow of our clients' products. Additionally we manage our selected and dedicated service providers to ensure that operations run as smoothly and efficiently as possible.

Customer service features include:

- Strategic network design
- Tactical planning and optimisation
- Detailed KPI and freight cost reporting

Movianto provides multi-modal consolidation services through its network of strategically located European distribution centres.

These regional or central hubs link primary and secondary distribution, forming the basis of Movianto's Integrated Supply Chain model.

Quality

The Movianto quality credo is upheld at all times. No service is offered without fulfilling the highest quality standards defined by the company and appreciated by Movianto clients Europe-wide. We handle with care.

Our standards include:

- Carrier screening and validation
- Detailed SOPs in line with GDP
- ISO 9001:2008
- CAPA reporting with follow-up and closure
- Business continuity planning

However, these technical quality assurances are not all. Movianto also vouches to provide improved levels of quality compared with other providers, and building client-specific requirements into SOPs and work instructions.
